

• AVAILABLE • OPEN TO SENIOR IC & STAFF ROLES

Hello, I'm Dipanshu Rana.

I design and ship resilient cloud platforms — turning complex systems into calm, reliable products.

01 / ABOUT

Engineer, mentor, quiet operator.

I'm a software engineer with 8+ years building distributed systems, developer platforms, and customer-facing apps across fintech and SaaS.

I care deeply about clarity — clean APIs, fast feedback loops, and teams that ship without drama. Recently I've been focused on Kubernetes-native platforms, event-driven architectures, and AI-assisted developer tooling.

02 / EXPERIENCE

Where I've shipped.

A timeline of roles, the things I built, and the teams I helped grow.

2022 - PRESENT

Senior Software Engineer · NimbusCloud Labs · Remote

- Led the migration of the billing platform to an event-driven architecture, cutting reconciliation latency by 78%.
- Built an internal developer platform on Kubernetes adopted by 14 teams across the org.
- Mentored 6 engineers; introduced an RFC process now used company-wide.

A timeline of roles, the things I built, and the teams I helped grow.

Where I've shipped.

2022 - PRESENT

Senior Software Engineer · Nimbus Cloud Labs · Remote

- Led the migration of the billing platform to an event-driven architecture, cutting reconciliation latency by 78%.
- Built an internal developer platform on Kubernetes adopted by 14 teams across the org.
- Mentored 6 engineers; introduced an RFC process now used company-wide.

2019 - 2022

Software Engineer II · Quark Fintech · Bengaluru

- Owned the payments orchestration service handling ~\$120M / month at p99 < 240ms.
- Designed a typed feature-flag SDK shipped to web, iOS, and Android clients.
- Drove SOC 2 evidence automation across 8 services.

2017 - 2019

Software Engineer · Orbit Studios · Pune

- Built customer-facing React apps used by 200k+ monthly users.
- Set up the company's first CI/CD pipeline on GitHub Actions.

· 03 / SKILLS

Tools I reach for.

Stack chosen pragmatically – boring where it should be boring, sharp where it matters.

 LANGUAGES TypeScript Python Go Rust SQL	 FRONTEND React Next.js Tailwind Framer Motion	 BACKEND Node.js FastAPI gRPC GraphQL Postgres MongoDB
 CLOUD & DEVOPS AWS GCP Kubernetes Terraform GitHub Actions	 PRACTICE System design DDD Observability Mentoring	

· 04 / PROJECTS

Selected work.

A few projects I'm proud of – platforms, infra tooling, and quiet OSS.

04 / PROJECTS

A few projects I'm proud of — platforms, infra tooling, and quiet OSS.

Selected work.

Helios — internal developer platform

A Kubernetes-native platform giving teams self-serve environments, golden paths, and one-click rollbacks.

GO

KUBERNETES

TERRAFORM

NEXT.JS

Drift — usage-based billing engine

Event-sourced billing for SaaS — flexible pricing, audit-grade ledger.

PYTHON

KAFKA

POSTGRES

05 / EDUCATION

Where I learned to think in systems.

Indian Institute of Technology, Bombay

Graduated with honors. Thesis on distributed consensus.

B.Tech, Computer
Science &
Engineering2013 –
2017

Delhi Public School, R.K. Puram

School topper, Computer Science.

Higher Secondary,

2021

07 / TESTIMONIALS

Words from teammates.

"Alex is the rare engineer who can hold the architecture in

Words from teammates.

"Alex is the rare engineer who can hold the architecture in their head and still write the cleanest pull request on the team."

Priya Raman

VP Engineering, Nimbus Cloud Labs

Occasional writing on engineering, platforms, and team dynamics.

Notes & essays.

Occasional writing on engineering, platforms, and team dynamics.

Notes & essays.

01	Designing internal platforms that engineers actually use	8 min	Nov 2025
02	Event sourcing without the regret — a pragmatic guide	12 min	Sep 2025
03	The quiet power of small, boring architectures	6 min	Jul 2025

Let's build something useful.

Got a role, a project, or just want to compare notes on platforms? Drop a line — I read every message.
